### Comments on transcription services provided by Ms Gloria Cooper

For the past year I have asked Ms Gloria Cooper to transcribe many interviews in digital format for me as part of a large-scale education policy study. I have also referred many of my post-graduate students to her to transcribe their research interviews.

The quality of the work which Gloria has produced in all these instances is excellent. Her work is accurate, produced within the agreed time frames and she does it in a most respectful manner. I am very pleased with what she has completed for my students and myself and will continue to ask her to do work for me and I will continue to refer students to her.

It is a pleasure to have such competence available.

Regards.
